Sublite Cushion Work Men's Athletic Work Shoe

Maximum lightness and flexibility in a work shoe. With deep flex grooves, the Sublite foam midsole reduces weight and allows for greater range of motion. Rubber pads provide traction at heel strike and forefoot takeoff while minimizing weight. Mesh uppers allow for ultimate breathability and moisture transfer for all day cooling comfort. A MemoryTech Massage footbed adapts to the unique contours of your foot. • ASTM F2413, Alloy Toe, XTR® Brand Alloy Toe Cap, Slip Resistant, Electrical Hazard Protection

PRICE V.I.	SIZES	COLOUR
\$950.00	5 - 13 W	Black

RB4250

ZPrint Work Men's Athletic Work Shoe

Engineered for excellent foot-tracking and cushioning. Underfoot materials come in three different densities, a foot-mapped 3D foam midsole that cushions on impact and propels at takeoff, a grid perimeter for stability, and the third in contact with the ground for abrasion and slip resistance. • Steel Toe • Seamless Textile & Mesh • ASTM F2413 • Steel Toe • Electrical Hazard Protection • Slip Resistant

FEATURES

CONSTRUCTION: DIRECT INJECTION TO THE CUT.
MADE OF: MICROFIBER CALIBER 1.9-2.1MM. BLACK AND BROWN COLOR.
COLLAR: POLYPROPYLENE FOAM WITH SYNTHETIC OUTER LINING
DIAMOND TYPE ENGRAVING.
INNER LINING: BREATHABLE ORANGE POLYESTER FABRIC,
RED AND GRAY.
BUTTRESS: POLYESTER NON-WOVEN FABRIC, COATED WITH SYNTHETIC
1.5MM THERMOFORMABLE ACRYLIC RESINS.
TONGUE: 10MM PU FOAM, DENSITY 45 WITH ENGRAVED PVC SHEETS
DIAMOND TYPE.
TOE: COMPOSITE RESISTANT TO 200 JULES.
EYELETS: HEXAGONAL IN POLYCARBONATE.
LACES: ROUND BRAIDED POLYESTER REINFORCED WITH CORE.
TWO-TONE: BLACK - GRAY BLACK - YELLOW BLACK - GRAY 110CM.
OVERSOLE: ANATOMICALLY DESIGNED AND INTERCHANGEABLE IN PU

TEST REPORTS

SOLE ABRASION
ABRASION STANDARD: ES NTC 4811:2000
REQUIREMENT: MAXIMUM 250 MM³ ACCORDING TO NTC ISO 20345 SOLE FLEXURE
STANDARD: NTC 632-2017
REQUIREMENT: MAXIMUM INCREMENT OF 4 MM. IN 30,000 CYCLES
DIELECTRIC RESISTANCE
STANDARD: ASTM F 2412:2018
REQUIREMENT: MAXIMUM 1.0MA LEAKAGE CURRENT. AFTER 1MINUTE AT 18KV.
TOP RESISTANCE
STANDARD: NTC - ISO 2034 - 2007 NUM 5.4
REQUIREMENT: 200 JULES OF IMPACT.

RECOMMENDATIONS:
DO NOT LEAVE IT PERMANENTLY IN THE SUN, ONLY DURING USE IF REQUIRED BY THE
USER, IF THE FOOTWEAR GETS WET, IT SHOULD BE DRIED AT ROOM TEMPERATURE.

CONNECT WITH US      

The gel pad built into the heel area was developed to provide essential shock absorption plus energy return.

Keeps you warm in cold temperatures.

This shoe is slip resistant on all common surfaces.

Thanks to special upper fabrics, like e.g. Softshell or particular processing, the article is water-resistant.

EVERCOMFORT WHITE

This ergonomically shaped footbed provides a correct position and an optimum support to the foot. The perforation and the hydrophobic, antibacterial fabric cover improve and balance the foot climate, while a cushioning pad at the heel absorbs the impacts from outside.

For all working big feet: these models are available up to size 48 or sometimes size 49.

COLD INSULATED

A special finish on the shoe protects against cold and keeps feet warm. CI certified safety shoes keep the heat in the shoe much longer and let the cold penetrate much slower.

The long lasting, water-repellent and wind-resistant hightech membrane is particularly breathable and protects the foot with a microporous mesh structure against waterlogging. It transports sweat and moisture to the outside. What remains is a delightful dry and comfortable body sensation.

At least for a short contact these outsoles are heat resistant up to 572°F. That's pretty hot.

A comfortable fit gives the foot enough room to move. Thus the shoe can be worn long and without pain.

BG Directive concerning orthopedic adjustments (insoles). Safety shoes must be tested according to it to guarantee that the shoe still meets the requirements of standard EN ISO 20345.

HEAT INSULATED
Protect feet from burns when working on surfaces up to 150°C for up to 30 minutes. Their outsole or midsole materials provide thermal insulation, preventing heat from reaching the feet, making them ideal for hot environments or areas with significant temperature changes.

The gel pad built into the heel area was developed to provide essential shock absorption plus energy return.

When producing this style we totally waive all kinds of animal products.

We adapted these models for a better fit on women's small feet.

The ultraflexible textile fabric perfectly adapts to the foot and fits like a sock.

SAFETY TOE MODELS: ASTM F2413-18 and ASTM F2412-18a

All PUMA SAFETY shoes meet or exceed the highest ASTM standards for toe impact I/75 and compression C/75 protection.

ASTM F2913-19 and F3445-21

All PUMA SAFETY shoes meet ASTM F2913-19 non-slip testing standards and ASTM F3445-21.

GRAVITATION MID BLACK Steel Toe Safety Footwear

ASTM F2413-18
ASTM F3445-21
M I/75 C/75 SD SR

The **ALBATROS® ClearTPU** line offers durable, comfortable, and protective footwear designed for demanding work environments. Featuring robust full-grain leather and advanced TPU sole technology, these shoes provide flexibility, lightweight wear, and enhanced durability against abrasions. The unique "windscreen-wiper effect" on TPU soles improves anti-slip safety by clearing water from surfaces. The transparent sole design highlights quality, while the ALBATROS® comfit AIR footbed offers shock absorption, arch support, and optimal foot positioning. The slip-resistant, odor-resistant, moisture-absorbing textile surface is also washable for easy care.

GRAVITATION MID offers closed dust tongue and leather collar. Its smooth full-grain leather upper, breathable 3D lining, and anatomically shaped comfit®AIR insole ensure comfort. The ClearTPU sole is slip-resistant, abrasion-resistant, and includes a scuff cap and shock absorber. Ideal for assembly, construction, craft, industry, and warehouse/logistics applications.

PUMA
SAFETY

OFFROAD AT HOME - Classic outdoor look combined with efficient security. The new SCUFF CAPS EVO are characterized by their fiberglass caps and BreathActive functional lining as light and breathable safety shoes. In the timeless stone color of the nubuck leather, a fashion-conscious look remains the focus, even for commercial use. The SCUFF CAPS EVO rubber sole remains resistant to heat up to 300 ° C and is non-slip even on unpaved surfaces.

This safety footwear features a composite fiberglass toe cap and is metal-free. It has an extra high shaft (about 17 cm) with a lateral YKK zipper and closed dust tongue, along with a TPU heel guard and kick-off in the heel area. The upper is made of nubuck leather, complemented by a breathable lining and an evercushion® BA+ footbed. The rubber outsole is heat-resistant (572°F), slip and oil resistant, meeting ASTM F2913-19 non-slip testing standards and ASTM F3445-21. Suitable for applications in agriculture, assembly, construction, and industry

CELERITY KNIT WNS LOW PINK Steel Toe Safety Footwear

ASTM F2413-18
ASTM F3445-21
SD SR

Comfortable safety shoes that don't look like safety shoes! The **CELERITY KNIT PINK WNS LOW** made of super soft SAFETY KNIT fulfills this wish with reliable security and high wearing comfort. The sole combination of ultra-light midsole and heat-resistant, non-slip rubber outsole up to 300 ° C is based on the latest running shoe technology. A torsion control system embedded in the middle supports the natural movement of the foot and also provides more stability. The lightweight evercushion® MISS footbed with a waffle structure keeps the inside of the shoe nice and cool and dry.

This safety shoe features a steel toe cap, IQ.Cell cushioning in the heel, and TPU protection at the toe and heel. Made with SAFETY KNIT® textile fabric, it includes a BreathActive lining for moisture control and an evercushion® MISS footbed for comfort. The rubber sole is heat-resistant up to 300°C, offers torsion control, and is designed for applications in assembly, crafts, industry, and logistics.

MISS SAFETY.

MOTION PROTECT 1.0.

WHAT WOMEN WANT - Comfortable safety shoes that do not look like those. The styles of PUMA SAFETY made especially for women fulfill this need while satisfying our high demands in terms of safety and comfort.

1

RUBBER OUTSOLE

This 572°F heat, oil and slip resistant rubber sole, with TPU protection in the heel area, is inspired by the latest running technology. The sole profile with its diagonal grooves ensures a perfect flexibility and a secure contact to the ground (SRC). (ASTMF 1677 Mark II)

2

TORSION CONTROL ELEMENT

The TPU torsion control element in the middle of the sole supports the natural flexing action of the foot while walking and provides a better support and stability for the feet.

3

EVA MIDSOLE

Thousands of tiny bubbles in this ultra lightweight midsole ensure an optimal cushioning and improve the flexing action of the foot.

4

IQ.CELL

The gel pad directly embedded in the heel area works just like a trampoline – it absorbs shock energy and returns it immediately as bounce.

SAFETY KNIT®

SAFETYKNIT®

STEP IN COMFORT- The highly flexible fabric adapts perfectly to the foot and fits like a sock. The SAFETYKNIT® upper, a mixture of high quality synthetic fibres, offers high flexibility, resistance and breathability.

EVERCUSHION® MISS

This anatomically designed lightweight footbed with waffle structure will keep your feet cool and dry by transmitting moisture away from the foot. The open cells allow a rapid drying when the shoes have been taken off.

CASCADES Disc MID S3 CI HI Black Composite Toe Safety Footwear

ASTM F2413

**-NEW-
COLLECTION**

The **SCUFF CAPS EVO** is built for the outdoors with an off-road design that delivers both comfort and reliable protection against daily work risks. Featuring a durable rubber outsole with a heavy-duty pattern, it resists heat up to 300°C while providing maximum grip and safety even on loose ground. The lightweight PU midsole is directly injected for full-foot shock absorption, and an extra-high scuff cap is added for durability — especially for those who kneel often on the job.

Practical features enhance both ease and comfort, such as the YKK side zipper with a dust flap to block dirt and prevent pressure points. Inside, the EVERCUSHION® BA+ footbed regulates moisture and provides a stable, non-slip surface. With dual-density foam cushioning, targeted heel and ball support, and longitudinal arch reinforcement, the design promotes natural foot positioning, reduces pressure, and stimulates muscles with every step.
